Title: Global Cyber Attack Overview 2023-2025

VISUALS

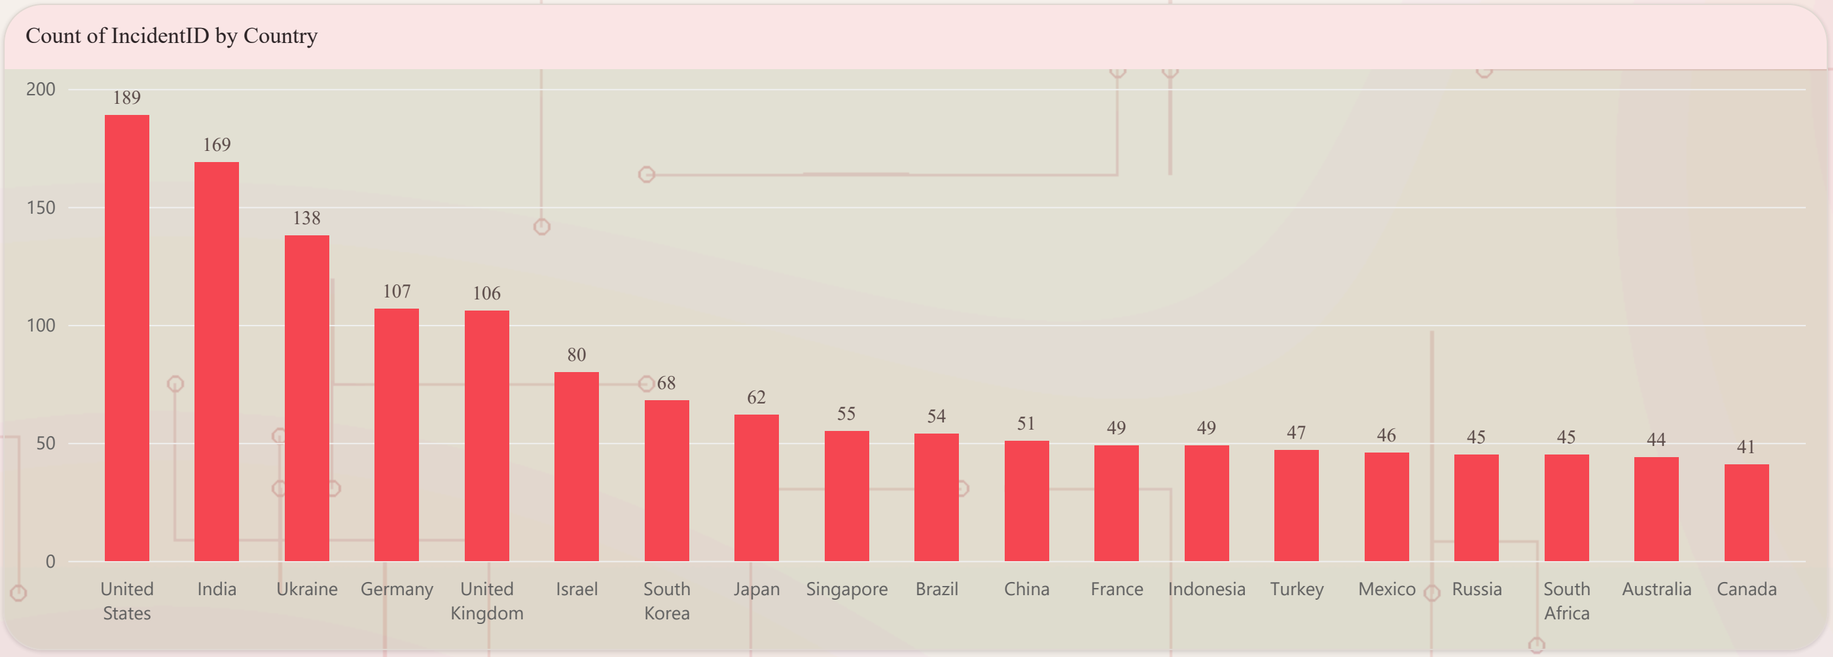

- - 5 KPI cards: Total Incidents | Total Loss (M USD) | Users Affected | Avg Resolution (hrs) | Critical %
- - Filled map: Country, size = Total Incidents
- - Line chart: Month vs Total Incidents
- - Slicers: Year, Region, AttackType

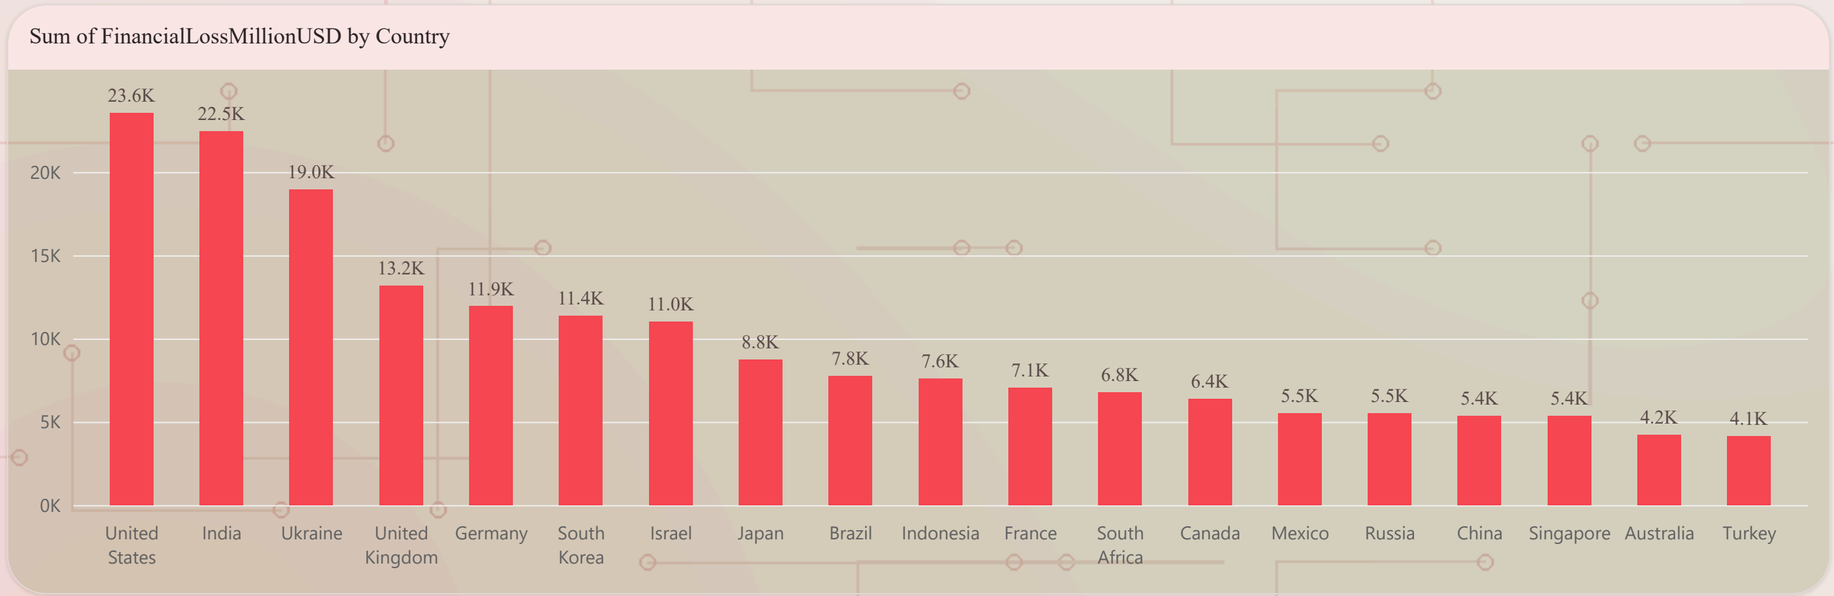

TEXT BOX

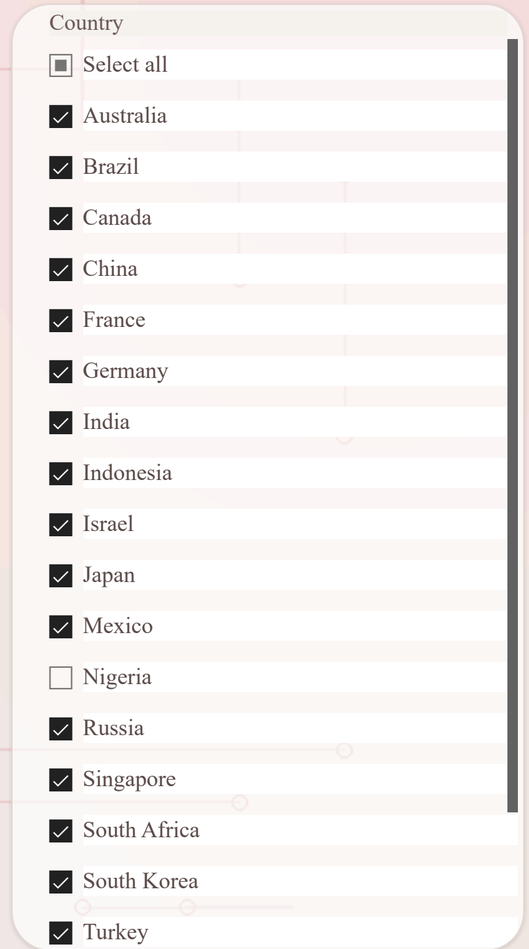

1,500 incidents were recorded across 20 countries between January 2023 and September 2025, causing about $192.4 billion in estimated losses. Average resolution time was 364.5 hours (about 15 days), and 22.1% of incidents were rated Critical. The United States (189), India (169) and Ukraine (138) saw the most incidents. Asia is the most affected region with 534 incidents, ahead of Europe (400) and North America (276).
